EXPERIENCE

Back End Developer

Bingo Singapore Pte. Ltd.

04/2024 - Present Noida, India

Company Description

- Developed scalable backend systems in **Laravel** for platforms like aiiongold.com, aiiongold.org, etdo.org, etdo.online, and Bingold.
- Migrated **Laravel backend to Node.js** for Aiiongold, improving performance and scalability.
- Built APIs, KYC module, referral system, and real-time data processing using Redis and WebSockets.
- Handled MySQL optimization and implemented secure authentication using JWT.

Web Developer (WordPress)

Mind Mingles

10/2023 - 04/2024 Mayur Vihar, India

Company Description

- Maintained and developed dynamic WordPress websites.
- Customized themes, optimized site speed, and implemented new functionalities as per client requirements.
- Worked on 400+ business websites and ensured on-time delivery and responsive design.

Web Developer (Frontend + PHP)

TourisinfoTech – Delhi, India

08/2022 - 10/2023 Location

Company Description

- Designed static and dynamic websites using HTML, CSS, JS, and PHP.
- Created reusable components and forms; connected with backend using PHP and MySQL.
- Built custom OTP API generator and implemented form validations.
- Collaborated with designers and backend team for complete lifecycle of projects.

PROJECTS

Aiiongold.com

Date period Location

A investment platform designed with Laravel and now being migrated to Node.js. Implemented real-time investment tracking, referral bonus system, and secure KYC integration.

- Successfully scaled to handle thousands of users and live transactions.
- Integrated JWT-based authentication and Redis-powered job queue for real-time performance.

MindMingles.com

Date period Location

SEO and digital marketing agency website.

- Contributed to redesign and SEO optimization of various service pages.
- Maintained WordPress backend and created multiple landing pages for international clients.

SUMMARY

Full Stack Web Developer with 3+ years of hands-on experience in designing, developing, and maintaining dynamic web applications. Proficient in Laravel, Node.js, and modern web technologies with a strong background in API development, server-side logic, and real-time systems. Transitioned from frontend and WordPress development to backend architecture for AI and crypto-based platforms. Fast learner, team player, and passionate about scalable backend systems.

SOFT SKILLS

- Team collaboration
- Problem-solving
- Self-motivated and fast learner
- Quick adaptation to new tech
- Detail-oriented

KEY ACHIEVEMENTS (COMPANY-SPECIFIC)

Achievements at Bingo Singapore Pte. Ltd.

Received 2 Performance Excellence Letters for exceptional backend development and consistent on-time project delivery.

Offered a Project Manager Role due to strong leadership, ownership of major platforms, and effective team collaboration.

Selected Twice for International Business Visits, representing the tech team in client demos, deployment strategy, and planning sessions.

API Development Leader

Developed 250+ APIs for scalable AI platforms, enhancing data handling capabilities.

PROJECTS

ETDO.org / ETDO.online

 Date period  Location

A full-featured **e-commerce platform** for buying/selling gold and jewellery online. Includes product listing, customer bidding system, and real-time gold buy/sell operations.

- Implemented **live bidding system** using WebSockets to enable real-time price tracking and user participation.
- Developed secure modules for user wallet, gold transactions, bidding history, and payment gateway integration.
- Designed admin panel to manage users, products, orders, and transactions efficiently.

Aiiongold.org (PMS Platform)

 Date period  Location

A **Portfolio Management System (PMS)** focused on gold-based investment and savings plans.

- Users can invest in digital gold, track daily profits, and refer others to earn bonuses.
- Built dynamic modules for KYC verification, referral tracking, and profit calculation using Laravel.
- Ensured platform security and scalability with Redis job queues and MySQL optimization.

Bingold.to

 Date period  Location

A blockchain-inspired platform to buy and manage **Bingold tokens**, a proprietary token developed by the company.

- Developed token purchase, wallet top-up, and referral bonus system using Laravel.
- Integrated user onboarding, KYC, and real-time token value tracking.
- Managed complete backend logic for token circulation and dashboard analytics.
